2013 PJVA/GPAC Joint Conference Summary

235 delegates were in attendance at the 2013 GPAC/PJVA Joint Conference, which took place at the BMO Centre for the 2nd year. This year's conference was filled with intriguing and informative presentations with three streams to choose from, in addition to the plenary sessions.

Some highlights of the conference included:

- An audience favorite - Alex Epstein, President and Founder of the Center for Industrial Progress, speaking on "How to Convert Fossil Fuel Opponents into Fossil Fuel Supporters" and "Energy Heroes".
- Technical stream presentations on Oil Sands Development, Improved NGL Quality and Entrance into the Midstream Gas Processing Business - many of these sessions lead to standing room only!
- Two extremely lively panel discussions during the JV analyst/admin stream: "Construction, Ownership and Operation Agreement" and "Keep Your Career Moving Forward".
- Very well received mini presentations from our conference exhibitors.

Planning has started for the 2014 conference. Look out for program and registration information to hit your inbox next summer. If there are any burning topics or speakers you would like to see featured, please notify the GPAC office.

SMi Faciliop - Corporate Sponsor Profile

SMi Faciliop a full service EPCM, engineering and environmental service company. Faciliop Experts was acquired by the S.M. Group International Inc. (www.groupesm.com) creating an exciting new division called SMi Faciliop (www.smifaciliop.com). The completion of the acquisition has not only allowed SMi Faciliop to provide full service EPCM in Canada, but also around the world. In 2013 SMi Faciliop was accredited ISO9001-2008 certification and in 2007 SMi was awarded Ernest & Young Entrepreneur of the Year.

Not your typical EPCM - SMi Faciliop roots come from field engineering and operations support for natural gas facilities, heavy oil, conventional oil, pipelines and LNG. Our team's time in the field working in extreme weather conditions around the globe allows us to bring that experience into our projects ensuring they work the first time. SMi Faciliop stands behind their projects and supports many of their clients for the life cycle of the asset, including the development of risk based asset management programs. SMi Faciliop provides our clients a range of engineering services and flexible support options that are aligned with their health, safety & environmental objectives and corporate philosophies.

SMi Faciliop's strategic partnership with CDS Research Ltd. (Vancouver, Canada) (www.cdsresearch.com), an LNG specialty engineering firm with worldwide experience allows us to provide complete end to end solutions for LNG projects.

For more information about SMi Faciliop, please visit us at the Calgary Oil & Gas Show (Hall F - Booth 8419), our website: www.smifaciliop.com, or email: info@smifaciliop.com.
